REPORT ON THE FIFTH SUMMIT OF THE AMERICAS

Introduction

1. The goal of this document is to report to the Governing Bodies of the Pan American Health Organization (PAHO) on the results of the Summit of the Americas held in Port-of-Spain, Trinidad and Tobago, from 17 to 19 April 2009 and, in particular, to highlight the principal health mandates from the Heads of State and Government set forth in the Declaration of Port-of-Spain and the role that the PAHO Secretariat will play in follow-up to these mandates.

Fifth Summit of the Americas, Trinidad and Tobago, 2009

2. The Summit was characterized by cordial atmosphere and open dialogue. It was presided over by the Honorable Prime Minister of Trinidad and Tobago, Patrick Manning. Some 34 Heads of States and Government from countries in the Americas attended, as did the directors and heads of 12 international organizations, including the Director of the Pan American Sanitary Bureau (PASB).

3. Prior to the Summit, meetings were held with civil society and the private sector, as well as the Youth Forum, and the Indigenous People’s Forum, in which the various items on the hemispheric agenda were discussed.

4. The Agenda of the Fifth Summit of the Americas included items such as the global economic and financial crisis and its impact on the Region, emphasizing threats to the social achievements in poverty reduction, unemployment, health, and education. The issues of social development and human prosperity, as well as energy security, global warming, public security, and democratic governance were also discussed.
5. The Declaration of Commitment of Port-of-Spain “Securing Our Citizens’ Future by Promoting Human Prosperity, Energy Security, and Environmental Sustainability” was negotiated over a nine-month period by the Member States at Summit Implementation Review Group (SIRG) meetings. The Prime Minister of Trinidad and Tobago signed the Declaration on behalf of the Heads of State and Government of the countries of the Hemisphere. PASB participated in this negotiation process and assisted the Summit Implementation Review Group (SIRG) in negotiating the paragraphs on health and related topics.

Hemispheric Health in the Declaration of Commitment of Port-of-Spain

6. The Declaration of Commitment of Port-of-Spain “Securing Our Citizens’ Future by Promoting Human Prosperity, Energy Security, and Environmental Sustainability” has 97 paragraphs, including the preamble. Thirteen paragraphs are devoted to public health issues in the Hemisphere; there are paragraphs on environmental sustainability, and one on public security. (See Table 1). The full text of the Declaration can be accessed in the four official languages at http://www.summit-americas.org/defaults.htm.

7. Health occupies an important place in the Declaration, and the Heads of State and Government expressly request the collaboration of the Pan American Health Organization (PAHO) and the Joint Summit Working Group (JSWG), of which PAHO is part, to help Member States comply with these mandates.

8. The Declaration includes a commitment to promote universal access to health care and to address the problems of the most vulnerable groups. Increasing social protection in health and access to services based on primary health care (PHC) are the main strategies for meeting these objectives (paragraphs 26, 31).

9. The Region is to be recognized for the significant steps it has taken to reduce mortality in children under 5, but neonatal mortality has not fallen at the same rate. PAHO support is requested, so that it can continue helping the countries address this problem through implementation of the Regional Strategy and Plan of Action for Neonatal Health within the Continuum of Maternal, Newborn, and Child Care. (Paragraph 27). Special attention is paid to reducing the incidence of vertical, or mother-to-child, transmission of HIV to less than 5% by 2015 (paragraph 35).

10. There is a need for improved access to safe and nutritious food to address the problem of malnutrition, especially for vulnerable groups and children under 5. Mention is also made of other problems linked with an unhealthy diet—for example, obesity and diabetes—which are discussed in three paragraphs of the Declaration (paragraphs 24, 32, 33). International organizations are called upon to support countries in fighting malnutrition using a multisectoral approach, with the participation of civil society and the
private sector. A commitment is made to improve the nutritional status of all people in the Americas by 2015 through full implementation of the PAHO Regional Strategy on Nutrition in Health and Development 2006-2015.

11. There is a strong commitment to reducing the noncommunicable disease (NCD) burden by promoting comprehensive, integrated prevention and control strategies. The Heads of State reiterate their support for the PAHO Regional Strategy and Plan of Action on an Integrated Approach to the Prevention and Control of Chronic Diseases, including Diet, Physical Activity, and Health. They are also committed to adopting measures to reduce tobacco consumption, taking into account as appropriate, the WHO Framework Convention on Tobacco Control. They also instruct their Ministers of Health, with the support of PAHO, to include the surveillance of NCDs and their risk factors in existing national health information reporting systems by 2015 (paragraphs 28, 29).

12. They reiterate their commitment to attain the Millennium Development Goals in terms of halting and beginning to reverse the spread of HIV/AIDS infection by 2015 through identification and implementation of strategies to scale up towards the goal of universal access to comprehensive programs for prevention, treatment, care, and support for people living with HIV. There is also a commitment to implement the Regional HIV/STI Plan for the Health Sector 2006-2015, in coordination with PAHO, UNAIDS and other relevant institutions, and another to participate in and strengthen the Global Fund to Fight AIDS, Tuberculosis, and Malaria (paragraph 35).

13. The Heads of State and of Government give high priority to adopting the provisions of the International Health Regulations (IHR) (2005) to prevent the international spread of disease and respond to health emergencies such as pandemic influenza, yellow fever, dengue, and others. They also commit to establishing the basic capacities needed in the countries for surveillance and response to events that could constitute public health emergencies of international concern and request that PAHO work with and support the countries, in accordance with the functions entrusted to it in the IHR (2005) (paragraph 34).

14. In the section on environmental sustainability, paragraphs 61 and 62 mention topics related to disasters. PAHO has an important role to play in this regard, particularly with its Safe Hospitals Initiative and educational efforts for prevention, mitigation, and care during and after disasters. Paragraph 63 mentions aspects of climate change and the support of JSWG institutions, of which PAHO is one.

15. In the section on public security, paragraph 74 recognizes that violence is preventable and establishes the commitment to formulate or strengthen policies that take an integrated approach to its prevention. It also acknowledges the First Meeting of Ministers of Health of the Americas on Violence and Injury Prevention, held in Merida,
Mexico in March 2008, which commits to further innovate, develop, implement, and evaluate plans for violence prevention.

**Monitoring the Health-Related Mandates of the Fifth Summit of the Americas**

16. The Pan American Sanitary Bureau (PASB), as the PAHO Secretariat and a member of the Joint Summit Working Group, coordinated by the OAS Summits of the Americas Secretariat, will report on the activities it carries out in compliance with the Declaration’s agreed-upon mandates.

17. Table 1 lists paragraphs on health and related topics taken from the Declaration of Commitment of Port-of-Spain 2009, numbered as they appear in the Declaration. Another column shows relevant PAHO Directing Council and World Health Assembly resolutions, and declarations made by Ministers of Health in the Hemisphere that include commitments and decisions to work together to solve problems.

18. At the meeting of the Joint Summit Working Group (JSWG), held on 18 June 2009, the OAS Summits of the Americas Secretariat reported on the progress made in the development of a system for follow-up and implementation of Summit mandates and invited the institutions to contribute with their information. It also noted the importance of strengthening relations between the ministerial meetings of the Inter-American System and the Summit process, which in our case would be relations with the Directing Council of PAHO.

19. Therefore, based on the mandates of the Fifth Summit of the Americas and the resolutions of the Governing Bodies of PAHO and WHO, the Bureau will prepare monitoring reports on the mandates and provide information about them to the Governing Bodies of PAHO. The reports on the health mandates will be sent to the OAS Summits Secretariat for consolidation and delivery to the Summit Implementation Review Group (SIRG), which meets annually as part of OAS General Assembly regular sessions.

20. Finally, the Directing Council is informed that during the ministerial-level meeting of the Summit Implementation Review Group (SIRG), held during the 39th General Assembly of the OAS, Colombia was confirmed as the host of the 6th Summit of the Americas in 2012.

**Action by the Directing Council**

21. The Directing Council is invited to note the information provided in this document.

| 23 Providing our people with adequate and timely access to safe and nutritious food is among the most immediate challenges confronting our Hemisphere and the world. We recognise the negative impact on our people of food crises when they occur, and commit to taking urgent and coordinated action, working in partnership with the relevant international and regional organisations, as appropriate, to develop and implement comprehensive policies and programmes in order to confront the challenges of food security. We reaffirm our commitment to the objective of the Millennium Declaration to halve by 2015 the proportion of people who suffer from hunger; and we recognise United Nations General Assembly Resolution 63/235, which calls for addressing these challenges. | CD48.R13  
| 26 We recognise that the problem of inequality of access to comprehensive health care and health services persists, especially among vulnerable groups. We therefore commit to redoubling our efforts to promote social protection and to identify and implement strategies to advance towards universal access to quality comprehensive health care, taking into account labour, environment, gender-sensitive and social security policies, as well as the Health Agenda for the Americas 2008–2017, and will seek to provide necessary resources in order to improve our health indicators. | CSP26.R19

| 27                                     | While the region has made significant progress in reducing both maternal mortality and mortality in infants and children under 5 years, neonatal mortality has not decreased at the same rate. We call on the Pan American Health Organization (PAHO) to continue to assist countries in addressing this problem through the implementation of the Regional Strategy and Plan of Action for Neonatal Health within the Continuum of Maternal, Newborn, and Child Care. We recognise the importance of cooperation in sharing experiences within the framework of the global Partnership for Maternal, Newborn and Child Health. | CD48.R4, Rev. 1 — Regional Strategy and Plan of Action for Neonatal Health within the Continuum of Maternal, Newborn, and Child Care

| 28                                     | We are convinced that we can reduce the burden of non-communicable diseases (NCDs) through the promotion of comprehensive and integrated preventive and control strategies at the individual, family, community, national and regional levels and through collaborative programmes, partnerships and policies supported by governments, the private sector, the media, civil society organisations, communities and relevant regional and international partners. We therefore reiterate our support for the PAHO Regional Strategy and Plan of Action on an Integrated Approach to the Prevention and Control of Chronic Diseases, including Diet and Physical Activity. We also commit to measures to reduce tobacco consumption, including, where applicable, within the World Health Organization (WHO) Framework Convention on Tobacco Control. | CD47.R9 — Regional Strategy and Plan of Action on an Integrated Approach to the Prevention and Control of Chronic Diseases, including Diet and Physical Activity
