Suspected case: patient with acute onset of fever >38°C (101°F) and severe arthralgia or arthritis not explained by other medical conditions, and who resides or has visited epidemic or endemic areas within two weeks prior the onset of the symptoms. Confirmed case: a suspected case with any specific CHIK test (viral isolation, RT-PCR, Ig M, or four-fold increase of chikungunya specific antibodies titers) - PAHO/CDC confirmed case definition available at www.paho.org/chikungunya.

Incidence rate (autochthonous suspected + autochthonous confirmed) / 100,000 pop.

Deaths directly or indirectly related to Chikungunya.

Population Division of the Department of Economic and Social Affairs of the United Nations Secretariat, World Population Prospects: The 2015 Revision, http://esa.un.org/unpd/wpp/index.htm, July 2015.

Iternational Programs Center, Population Division, U.S. Census Bureau. IDB Release Date: December 2013

According to the case definitions used by the French Caribbean, probable and confirmed cases are included under confirmed cases, as per PAHO's case definitions.

(1)The difference between the number of reported confirmed cases (21) and suspected cases (23) from EW 35 of 2017 is due to updated data reported by the Nicaraguan Ministry of Health. Builetins available http://www.minisa.gob.nlindex.phpresorb/guiletas/energian/gu

*In EW 5 of 2017, the number of suspected (cumulative) cases changed from 2 to 423, because both suspected and probable cases were included. http://vigisalud.gov.py/boletines/03_03_2017_12_07_12_Boletin-Epidemiologico_SE-5.pdf **The difference between the number of reported suspected cases from 25 August 2017 (849 suspected cases) to 01 September 2017 (822 suspected cases) is due to retrospective adjustment of data by the Peru Ministry of Health, which is published at: http://www.dge.gob.pe/portal/docs/vigilancia/sala/2017/SE33/chikun.pdf

*** The number of suspected cases increased from 539 to 1.289, based on the update made on April 26, 2017 by the Ministry of Health to the data provided in the tool to conduct the consultation of cases with suspected diagnosis and is reported to SNIS-VE. valiable at: http://estadisticas.minsalud.gob.bo/reportes_vigilancia/default_vigilancia.aspx. Date of consultation: May 1, 2017.

**The difference between the number of reported confirmed cases (6) and suspected cases (852) from EW 34 of 2017 to the number of confirmed cases (23) and suspected cases (849) from EW 35 of 2017 is due to updated data reported by the Colombia

Amistry of Health. Bulletins available at: http://www.ins.gov.co/boletin-epidemiologico/Boleth%20Epidemiolgico/2017%20Bolet%C3%ADn%20epidemiol%C3%B3gico%20semana%2035.pdf And http://www.ins.gov.co/boletin-pidemiologico/Boleth%20Epidemiolgico/2017%20Bolet%C3%ADn%20epidemiol%C3%B3gico%20semana%2034.pdf

****The difference between the number of reported confirmed cases (104,298 cases) and suspected cases (58,837) from EW 31 of 2017 to the number of reported confirmed cases (112,963) and suspected cases (21,784) from EW 33 of 2017 is due to updated da by the Brazilian Ministry of Health. Bulletins available at. http://portalsaude.saude.gov.br/images/ddf/2017/agosto/292/017/205/Monitoramento-dos-cases-de-dengue-febre-de-chikungurye-efebre-pelo-virus-Zika-ete-a-Semane-Epidemiologica-33-de-2017, pdf And http://portalsaude.saude.gov.br/images/pdf/2017/agosto/23/2017_024-Monitoramento-dos-cases-de-dengue-febre-de-chikungurye-efebre-gelo-virus-Zika-ete-a-Semane-Epidemiologica-33-de-2017, pdf And http://portalsaude.saude.gov.br/images/pdf/2017/agosto/23/2017_024-Monitoramento-dos-cases-de-dengue-febre-de-chikungurye-a-febre-gelo-virus-Zika-ete-a-Semane-Epidemiologica-33-de-2017, pdf And data reported

""What the total confirmed cumulative cases published on 7 July 2017 had included one imported confirmed case reported by the Panama Ministry of Health. This imported case is no longer included in the current cumulative total. On 14 July 2017 cumulative suspected sees for a second Department of Health data: http://www.salud.gov.pr/Estadisticas-Registros-y-Publicaciones/Pages/Informe-Arboviral.aspx

Data source : Cases reported by IHR NFPs to PAHO/WHO and/or through Member States websites or official news publication. Cases reported by CARPHA for non-Latin Caribbean countries, unless other source specified
