

Argentina - Capital Federal (Ages 13-15)

Global Youth Tobacco Survey (GYTS)

FACT SHEET

The Argentina - Capital Federal GYTS includes data on prevalence of cigarette and other tobacco use as well as information on five determinants of tobacco use: access/availability and price, exposure to secondhand smoke (SHS), cessation, media and advertising, and school curriculum. These determinants are components Argentina - Capital Federal could include in a comprehensive tobacco control program.

The Argentina - Capital Federal GYTS was a school-based survey of students in 1st, 2nd and 3rd secondary, 8th and 9th EGB, and 1st conducted in 2003.

A two-stage cluster sample design was used to produce representative data for Argentina - Capital Federal. At the first stage, schools were selected with probability proportional to enrollment size. At the second stage, classes were randomly selected and all students in selected classes were eligible to participate. The school response rate was 91.7%, the class response rate was 100.0%, the student response rate was 82.0%, and the overall response rate was 75.2%. A total of 1,295 students aged 13-15 participated in the Argentina - Capital Federal GYTS.

Prevalence

- 51.1% of students had ever smoked cigarettes (Boy = 48.0%, Girl = 54.3%)
- 24.9% currently use any tobacco product (Boy = 22.4%, Girl = 27.5%)
- 21.9% currently smoke cigarettes (Boy = 17.2%, Girl = 26.8%)
- 6.2% currently use other tobacco products (Boy = 9.2%, Girl = 3.2%)
- 27.0% of never smokers are likely to initiate smoking next year
