

Satellite Title: *It's time for PrEP in Latin America and the Caribbean!* (SUSA23)

Satellite organization: Pan American Health Organization (PAHO)/World Health Organization (WHO)

Time slot: 21st July 2019 – 5-7pm

Room: Casa del Diezmo 3 & 4

Duration: 120 minutes

Room capacity: 480

Satellite description

This satellite will showcase country experiences and regional initiatives in Latin American and the Caribbean (LAC) to advance PrEP implementation within HIV combination prevention strategies with focus on key populations, through engagement of policy-makers, providers and the community. Experiences from early adopter countries will be presented, including from public sector PrEP implementation, demonstration projects, and community engagement to organize a regional collective effort for PrEP advocacy and demand generation. Panelists will present innovative approaches to address challenges related to service delivery, including for adolescents and sexually transmitted infections in the context of PrEP. The WHO technical brief on event-driven PrEP will be launched, with discussion around the introduction of this alternative dosing schedule for MSM in LAC. The JHPIEGO/PAHO/WHO PrEP e-learning package in English and Spanish will be presented.

It's time for PrEP in Latin America and the Caribbean!	
Moderators: Giovanni Ravasi (PAHO/WHO); Beatriz Grinsztejn (FIOCRUZ)	
Part 1 – Event-driven PrEP (ED-PrEP): evidence and new WHO policy brief	
On demand PrEP for MSM: Insights from the ANRS Ipergay and Prevenir Studies	Jean Michel Molina (University of Paris, France)
