IN THE AMERICAS Regional Workshop

Blood Pressure Devices and Efforts for Blood Pressure Control

Professor James Sharman

Menzies Institute for Medical Research, University of Tasmania

Australia

Largest modifiable risk factor for CVD

Accurate BP measurement is among the most important medical tests

Lowering high BP will improve CVD outcomes

Essential products and investigations

Essential technologies/lab investigations	Tools
stethoscope	BMI chart
blood pressure measurement device*	
measuring tape	
weighing machine (scale)	
glucometer	
blood glucose test strips	
urine albumin test strips	
urine ketones test strips	
Add, when resources permit:	
blood cholesterol assay	
lipid profile	
serum creatinine assay	
serum potassium	
haemoglobin a1c	
urine microalbuminuria test strips	

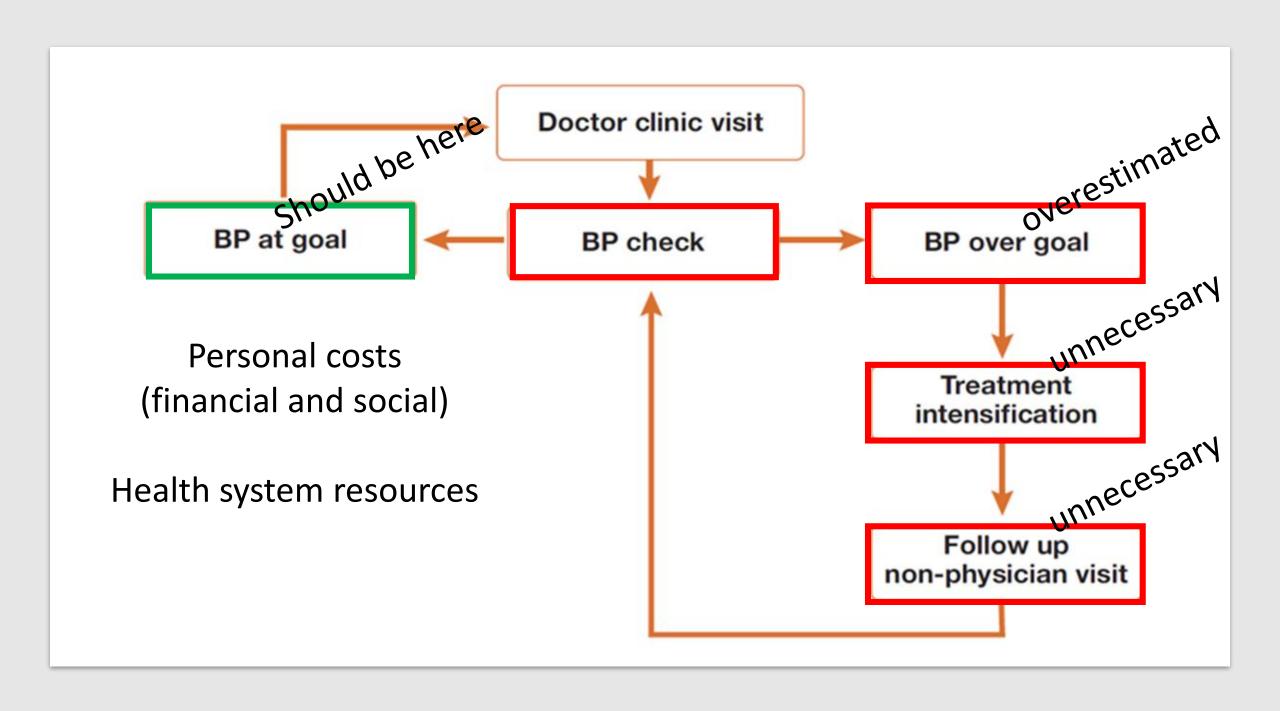

*Validated blood pressure measurement devices with digital readings are preferable.

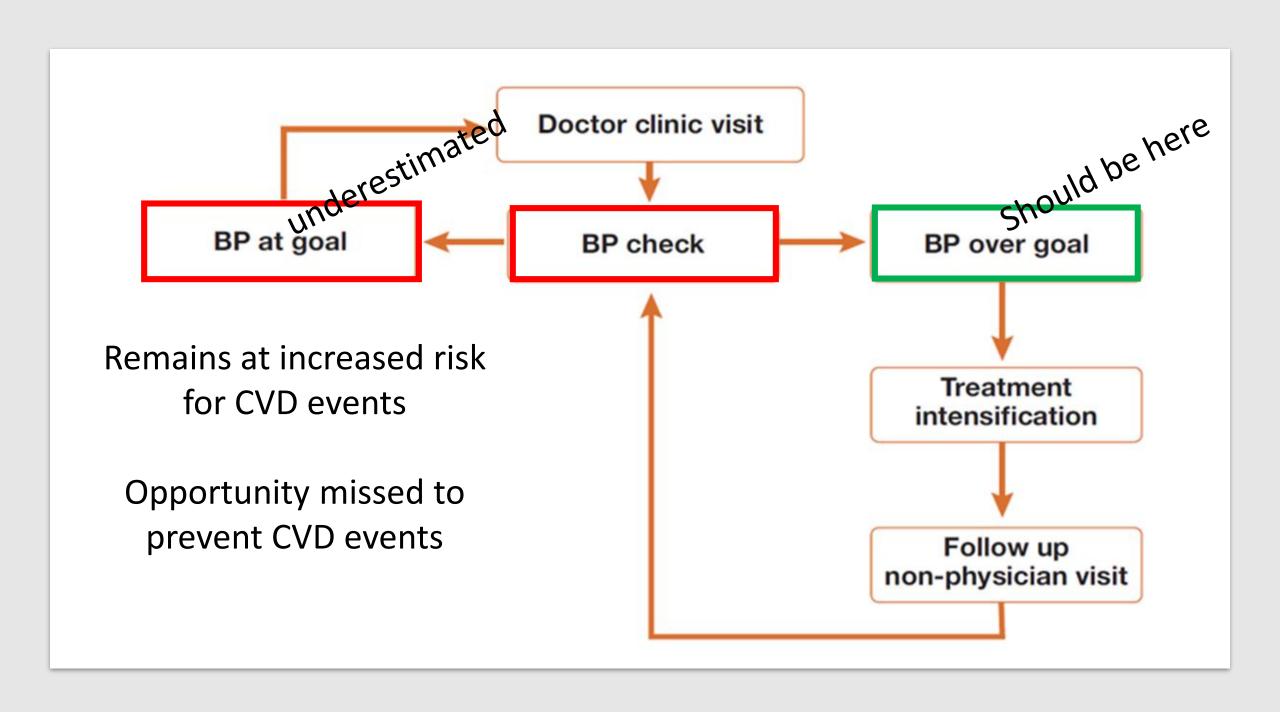

Validated = Accurate

(more likely to be accurate)

Approach to care of individuals is highly dependent on BP level

Hypertension diagnosis
≥140/≥90 mmHg
(2 visits, different days)

Each example of BP inaccuracy.....
